Uzair Ur Rehman (BIM Coordinator)CanBIM Certified

engr.uzairofficial@gmail.com Uzair's LinkedIn Profile 0537854209

Jeddah,Saudi Arabia Transferable Iqama Portfolio Link: Uzair's Portfolio

About me

Results-driven BIM Engineer with 5+ years of experience in BIM workflows, clash detection, and 4D/5D BIM, compliant with Saudi and international standards (ISO 19650, BIMForum LOD). Proven track record in leading multidisciplinary coordination, enhancing project efficiency and implementing sustainable BIM practices.

PROFESSIONAL EXPERIENCE

BIM Coordinator
Havelock One (Interior Fit-out) | Jeddah, KSA | Feb 2026 – Present
Project: Four Season Hotel and Private Residences Jeddah
Scope: Interior Fitout
Responsibilities

- Playing a key role in implementing BIM
- Resolving clashes using Revizto and Navisworks before implementing drawings on the site by Site engineer
- Creating BIM Model from Cad drawings
- Creating AIM, PIM , LION, BEP, Revit Templates
- Managing BIM models throughout the design and construction stages and collaborating with design and construction team
- Using Pyrevit , Diroots , BIM Interoperability , Dynamo and other automation tool to make the work flow easy
- Collaborating with designer, Site engineer and team members to increase the productivity and maintains the project base line
- Providing BIM Technical Support
- Conduct quality checks on BIM model
- Revising BIM model of sub-contractor as per ISO standard 19650
- Weakly submission of BIM Model via ACC, Accnox and Revizto
- Weakly BIM progress presentation

BIM Engineer
CONSOL Arabia Contracting (ALEC Fit-out) | Riyadh, KSA | Jun 2025 – Feb 2026
Project: ILMI Science & Innovation Center MISK City Riyadh
Scope: Interior Fitout
Responsibilities

- Developed LOD 400 architectural models for *ILMI Center MISK City,Riyadh KSA*, reducing rework by 25% through clash resolution in Revizto.
- Creating interior Fitout shop drawings (LOD-400) for site execution
- Coordinating with MEP, Lighting and Structure disciplines.
- Quantity takeoff using BIM for Site work
- Crating LOD 400 BIM model
- Model health check using BIM Interoperability tool
- Creating Revit families, filters and templates for team members which increase project efficiency by 75%
- Led weekly BIM coordination meetings, resolving clashes across MEP, structural, and architectural disciplines.
- Managed MIDP & TIDP, improving project delivery efficiency by 20%
- Generated quantity take-offs(5D) (QTOs) and material BOQs from BIM models to support procurement and workforce planning.

- Created Dynamo scripts for sheet creation and exporting sheets to pdf and cad and then saving it with project standard naming convention aligned with ISO-19650 increasing work efficiency by 60 %
- Produced and processed LOD 300–400 shop drawing models for review, approval, and field implementation.
- Streamlining Sheets creation flow in PDF & CAD format as per naming convention in BEP using DiRoots plugin
- Creating hatch pattern using Pyrevit
- Weakly submission of BIM Model (.rvt,nwc,IFC) to Revizto and ACC

BIM Specialist (Freelance)
Mint Creative Production | Tabuk, Saudi Arabia | Jan 2025 – Jun 2025
Project: Tabuk Entertainment Complex | Saudi Entertainment Venture- Tabuk, KSA
Responsibilities

- Created parametric Revit families for Tabuk Entertainment Complex, achieving 95% model accuracy.
- Managed clash detection reports, resolving 200+ conflicts ahead of schedule.
- MIDP & TIDP to track the project submission on time and make it easy for team to achieve milestones
- Clash detection using Navisworks
- Weakly submission of BIM Model to Revizto and ACC
- Prepared and printed drawing sets for team reviews and approvals.
- Supported clients by calculating quantities for material orders and crew work planning.
- Developed detailed 3D models and shop drawings with accurate dimensions for field use and review.
- Ensured timely and accurate preparation of BIM models, shop drawings, and related deliverables.
- Maintained and submitted daily and weekly timesheets in a timely manner.
- Weakly submission of BIM Model (.rvt,Nwc,IFC) to Revizto and ACC Projects

BIM Engineer
DMS Management Group| Florida| USA July 2023 - Nov 2024
Projects

- Police Department Academy And Regional Training Center San Jose, USA (Structure and Shop Drawings LOD400)
- Cerro Coso community college sport complex California, USA (Structure and Shop Drawings LOD400)
- Cuesta college NCC Orlando, USA (Structure and Shop Drawings LOD350)

Responsibilities

- Light gauge steel modeling using MWF Pro metal Plugin in Revit
- BIM Modeling, LOD-300 (design), LOD-400 (construction)
- BIM Modeling & Documentation: Developed LOD 300 (Design) & LOD 400 (Construction) models in Revit, specializing in light gauge steel framing using MWF Pro Metal Plugin, ensuring compliance with BIM standards (ISO 19650, NBIMS-US).
- BIM Coordination & Clash Detection: Conducted multi-disciplinary coordination with General Contractors (GC), subcontractors, and consultants, resolving clashes in Navisworks and maintaining adherence to the BIM Execution Plan (BEP).
- Project Setup & Standardization: Created and maintained Revit project templates, shared parameters, and custom families to streamline workflows and enforce company BIM protocols.
- Collaborative Model Management: Facilitated cloud-based collaboration via BIM 360/ACC, ensuring model integrity, version control, and compliance with subcontractor submission guidelines.
- BIM Quality Control: Performed model audits against BIM checklists, ensuring alignment with AIA E203, G202, and project-specific requirements.
- Construction Technology Integration: Managed project documentation and workflows in Procore & Revizto enhancing RFI tracking, submittals, and issue resolution for improved project delivery.
- Stakeholder Coordination: Actively participated in weekly BIM coordination meetings, tracking progress, mitigating risks, and ensuring VDC (Virtual Design & Construction) alignment with client expectations.

BIM Engineer

Proctor Global Design, Islamabad, Pakistan (Rabiah Garden company, Riyadh, KSA) | Jan 2022 - May 2023

Projects

- SIX FLAGS QIDDIYA THEME PARK (Riyadh, KSA) (Landscaping LOD 400)
- Design and Build of NEOM Base Economy Assets HAQL (Neom, KSA) (Structure LOD 400 and Architecture LOD 400)

Responsibilities

- Designed and delivered LOD 400 architectural and structural BIM models in Revit, aligned with ISO 19650 standards and project BIM Execution Plan (BEP) requirements.
- Generated IFC files for seamless multi-disciplinary coordination and produced fabrication-ready shop drawings to support construction workflows.
- Collaborated with engineers, architects, contractors, and consultants to facilitate BIM coordination, ensuring accurate information exchange and adherence to project timelines.
- Conducted BIM model vs. drawing reviews to validate accuracy, minimize errors, and enhance deliverable quality in compliance with AEC standards.
- Developed custom parametric Revit families tailored to project needs, improving modeling efficiency and standardization.
- Performed multi-trade clash detection in Navisworks, generated detailed clash reports, and resolved conflicts to reduce on-site rework.
- Established Revit view templates, project parameters, and modeling protocols to optimize workflows, streamline project setup, and maintain consistency.
- Created 4D BIM schedules in Navisworks, integrating construction phasing to visualize sequencing and improve project planning efficiency.
- Submitted weekly BIM model deliverables (.RVT, .NWC, .IFC) to Revizto and Autodesk Construction Cloud (ACC) for centralized project collaboration.

BIM Engineer

Innovative design and Consultant | Pakistan |Dec 2019-Nov 2021 (Structure & Architecture)

Projects

- NEOM Labor house (Structure LOD400 & Architecture LOD400)
- J7 Emporium Mall Islamabad (Structure LOD 350)
- J7 ICON Mall & Raddison Blu 5 Star Hotel (Structure LOD 350 & Architecture LOD400)

Responsibilities

- Developed LOD 300-compliant architectural and structural models, ensuring 95% accuracy in clash detection and minimizing rework during construction.
- Generated detailed architectural & structural construction drawings, reducing design errors by 30% and improving project coordination.
- Created precise 3D models and as-built models, enhancing visualization and reducing on-site discrepancies by 25%.
- Prepared quantity take-offs and material schedules, optimizing cost estimation accuracy within 5% variance and supporting efficient resource planning.
- Produced fabrication drawings and schedules for structural components, improving fabrication efficiency by 20% and reducing material wastage.
- Specialized in reinforcement detailing for rafts, slabs, beams, columns, shear walls, piles, and retaining walls, ensuring 100% compliance with design standards and structural integrity.
- Attended and managed model coordination and pre-construction/BIM meetings, documenting site issues and resolutions.
- Coordinated 3D models with internal teams, subcontractor detailers, and modelers to ensure alignment and accuracy.
- Recorded coordination sign-offs and processed shop drawing level models for review and approval.
- Assisted the project team in construction coordination, sequencing, and scheduling activities.

Education

Post Graduate Diploma In BIM & Construction Management	CanBIM Canada	91 %
Bachelor Of Civil Engineering	UET Peshawar	88 %
NEBOSH Health & Safety In Construction	NEBOSH UK	85 %

Certification Click to View : Certification link

- BSI ISO 19650

Revizto Red Academy

- Revizto Level 1
- Revizto Level 2
- Revizto Level 3

Procore

- Procore certified Student
- Procore for BIM manager

Plannerly

- Certified information manager level 1 basic course

BIM Certification

- CanBIM Foundations Software Skills -S4 (Canada)
- BIM Fundamental for engineer
- BIM Essential training for Structure Rivet
- BIM Rivet Structure Certified Professional
- An introduction to building information modelling
- Basics of Building Information Modeling

Software Skills

- Autodesk Revit
  - Pyrevit
  - BIM Interoperability tool
  - DiRoots
- Autodesk Navisworks
- Autodesk AutoCAD
- Autodesk Civil 3D
- Synchro 4D
- Aconex
- Procore
- BIM360
- Revizto
- ACC
