Jeddah,Saudi Arabia | Website: Explore My BIM Portfolio

About me

Results-driven BIM Coordinator with 5+ years of experience in BIM workflows, clash detection, and 4D/5D BIM, in heigh rise buildings compliant with Saudi and international BIM standards (ISO 19650). Proven track record in leading multidisciplinary coordination, enhancing project efficiency and implementing sustainable BIM practices.

PROFESSIONAL EXPERIENCE

BIM Coordinator
Havelock One (Interior Fit-out) | Jeddah, KSA | Feb 2026 – Present
Project: Four Season Hotel and Private Residences Jeddah (5 Star hotel)
Scope: Interior Fitout
Responsibilities

- ***Creating Template, naming convention, model arrangement, CDE management (Autodesk Forma), QC Check of BIM models***
- Using ***Pyrevit , Diroots , BIM Interoperability , Dynamo*** and other automation tool to make the work flow easy
- Resolving clashes using ***Revizto*** and ***Navisworks*** before implementing drawings on the site-by-Site engineer
- Playing a key role in implementing BIM in Havelock one
- Managing BIM team in creating ***BIM Model***
- Managing BIM models throughout the design and construction stages and collaborating with design and construction team
- Collaborating with designer, Site engineer and team members to increase the productivity and maintains the project base line
- Providing ***BIM Technical Support*** to BIM Team
- Strong understanding of ***BIM Coordination and multidisciplinary model integration***
- Conduct ***quality checks*** on BIM model
- Task tracking of BIM Team
- Coordinating with the site and design team
- Revising BIM model of sub-contractor as per ***ISO standard 19650***
- Weakly submission of BIM Model via ***ACC, Accnox and Revizto***
- Weakly BIM progress presentation

BIM Coordinator
CONSOL Arabia Contracting (ALEC Fit-out) | Riyadh, KSA | Jun 2025 – Feb 2026
Project: ILMI Science & Innovation Center MISK City Riyadh (Heigh rise educational)
Scope: Interior Fitout
Responsibilities

- Creating ***Revit families***, filters and templates for team members
- Leading BIM team to complete the task as per TIDP / MIDP
- Crating ***LOD 400*** BIM model
- Coordinating with MEP, Lighting and Structure disciplines.
- Creating interior Fitout shop drawings (LOD-400) for site execution
- ***Quantity takeoff*** using BIM for Site work
- Model health check using ***BIM Interoperability*** tool
- Led ***weekly BIM coordination*** meetings, resolving clashes across MEP, structural, and architectural disciplines.

- Generated quantity take-offs(**5D**) (QTOs) and material BOQs from BIM models to support procurement and workforce planning.
- Produced and processed ***LOD 300–400*** shop drawing models for review, approval, and field implementation.
- Streamlining Sheets creation flow in PDF & CAD format as per naming convention in BEP using DiRoots plugin
- Creating hatch pattern using Pyrevit
- Weakly submission of BIM Model (.rvt,nwc,IFC) to Revizto and ACC

BIM Specialist (Freelance)
Mint Creative Production | Tabuk, Saudi Arabia | Jan 2025 – Jun 2025
Project: Tabuk Entertainment Complex | Saudi Entertainment Venture- Tabuk, KSA
Responsibilities

- Created ***parametric Revit families*** for Tabuk Entertainment Complex, achieving 95% model accuracy.
- Managed clash detection reports, resolving 200+ conflicts ahead of schedule.
- ***MIDP & TIDP*** to track the project submission on time and make it easy for team to achieve milestones
- Clash detection using ***Navisworks and Revizto***
- Weakly submission of BIM Model to ***Revizto and ACC***
- Prepared and printed drawing sets for team reviews and approvals.
- Supported clients by calculating quantities for material orders and crew work planning.
- Developed detailed 3D models and shop drawings with accurate dimensions for field use and review.
- Ensured timely and accurate preparation of BIM models, shop drawings, and related deliverables.
- Maintained and submitted daily and weekly timesheets in a timely manner.
- Weakly submission of BIM Model (.rvt,Nwc,IFC) to Revizto and ACC Projects

BIM Engineer
DMS Management Group| Florida| USA July 2023 - Nov 2024
Projects

- Police Department Academy And Regional Training Center San Jose, USA (Structure and Shop Drawings LOD400)
- Cerro Coso community college sport complex California, USA (Structure and Shop Drawings LOD400)
- Cuesta college NCC Orlando, USA (Structure and Shop Drawings LOD350)

Responsibilities

- Light gauge steel modeling using MWF Pro metal Plugin in Revit
- ***BIM Modeling, LOD-300 (design), LOD-400 (construction)***
- ***BIM Modeling & Documentation***: Developed LOD 300 (Design) & LOD 400 (Construction) models in Revit, specializing in light gauge steel framing using MWF Pro Metal Plugin, ensuring compliance with BIM standards (ISO 19650)
- BIM Coordination & Clash Detection: Conducted multi-disciplinary coordination with General Contractors (GC), subcontractors, and consultants, resolving clashes in Navisworks and maintaining adherence to the BIM Execution Plan (BEP).
- ***Project Setup & Standardization***: Created and maintained Revit project templates, shared parameters, and custom families to streamline workflows and enforce company BIM protocols.
- ***Collaborative Model Management***: Facilitated cloud-based collaboration via BIM 360/ACC, ensuring model integrity, version control, and compliance with subcontractor submission guidelines.
- ***BIM Quality Control***: Performed model audits against BIM checklists, ensuring alignment with AIA E203, G202, and project-specific requirements.
- ***Construction Technology Integration***: Managed project documentation and workflows in Procore & Revizto enhancing RFI tracking, submittals, and issue resolution for improved project delivery.
- ***Stakeholder Coordination***: Actively participated in weekly BIM coordination meetings, tracking progress, mitigating risks, and ensuring VDC (Virtual Design & Construction) alignment with client expectations.

BIM Engineer

Proctor Global Design, Islamabad, Pakistan (Rabiah Garden company, Riyadh, KSA) | Jan 2022 - May 2023

Projects

- SIX FLAGS QIDDIYA THEME PARK (Riyadh, KSA) (Landscaping LOD 400)
- Design and Build of NEOM Base Economy Assets HAQL (Neom, KSA) (Structure LOD 400 and Architecture LOD 400)

Responsibilities

- Designed and delivered ***LOD 400*** architectural and structural BIM models in Revit, aligned with ***ISO 19650*** standards and project BIM Execution Plan (BEP) requirements.
- Generated IFC files for seamless multi-disciplinary coordination and produced fabrication-ready shop drawings to support construction workflows.
- Collaborated with engineers, architects, contractors, and consultants to facilitate BIM coordination, ensuring accurate information exchange and adherence to project timelines.
- Conducted ***BIM model vs. drawing reviews*** to validate accuracy, minimize errors, and enhance deliverable quality in compliance with AEC standards.
- Developed custom ***parametric Revit families*** tailored to project needs, improving modeling efficiency and standardization.
- Performed multi-trade clash detection in Navisworks, generated detailed clash reports, and resolved conflicts to reduce on-site rework.
- Established Revit view templates, project parameters, and modeling protocols to optimize workflows, streamline project setup, and maintain consistency.
- Created 4D BIM schedules in Navisworks, integrating construction phasing to visualize sequencing and improve project planning efficiency.
- Submitted weekly BIM model deliverables (.RVT, .NWC, .IFC) to Revizto and Autodesk Construction Cloud (ACC) for centralized project collaboration.

Education

Post Graduate Diploma In BIM & Construction Management	CanBIM Canada	91 %
Bachelor Of Civil Engineering	UET Peshawar	88 %
